

My name is Brian Hart. I am a user of the Cingular cell-phone service. I want to comment on Docket 04-208. I am in favor of this action by the FCC and urge the FCC to take decisive action on behalf of the taxpaying public and consumers to stop wireless companies from adding extra fees to their services simply to improve their bottom line. Also, I am in favor of the FCC taking action to require that wireless companies build all fees into the amounts advertised for wireless service plans.
